RELATED TO SUBSTANCE ABUSE**

This information has been disclosed to you from records protected by federal confidentiality rules (42 C.F.R Part II). The Federal rules prohibit you from making any further disclosure of this information unless further disclosure permitted by the written consent of the person to whom it pertains or as otherwise permitted by 42 C.F.R. Part II. A general authorization for the release of medical or other information is not sufficient for this purpose. The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient.

To whom it may concern:

Ms Linda Livolsi (DOB ~~XXXXXX~~) is a 47 yo female that has been under my care and medical supervision for the last four months. Ms Livolsi has a rather complex list of medical conditions that include seronegative lupus, fibromyalgia, chronic pain syndrome, Colitis, Hypothyroidism, and recurrent migraine headaches. She also has a remote history of pneumocystis jirovec pneumonia and acute myelogenous leukemia in remission. She has been recently evaluated for idiopathic syncope and bloody diarrhea that has required two separate hospitalization in the last three months. She currently has multiple outstanding specialty appointments with Oncology, Gastroenterology, and Rheumatology in the next three weeks. The patient is currently using high level of controlled medications including narcotics that will need to be modified prior to her reporting period. The abrupt discontinuation of the immunosuppressant and controlled medication would place the patient at high risk for developing rebound and/or withdrawal symptoms. The patient is working specialist to make drug modification that would be consistent with the care that is available in the Federal Bureau of Prisons. It is my opinion that this transition should completed in the next 4-6 weeks.

List of up-coming appointments:

July 21st - Dr Malloy (Rheumatology), July 27th Gastroenterology, Aug - 10th Dr Janjua (Hematology)

Per Patient which I have not confirmed includes: Aug - 13th Pain Management, Aug - 17th Optometrist

Below is a current list of her medications:

Current Outpatient Prescriptions on File Prior to Visit

Medication	Sig	Dispense	Refill
• acetaminophen (TYLENOL) 325 mg tablet	Take by mouth as needed for pain.
